

FLEXIDINGERS

POP-UP AND CAP & LINING

Plastec Flexidingers are flexible connectors, ideal for accommodating varying angles and gradients where space below spas and baths is limited.

Supplied with a flexible tube with a smooth internal bore, Flexidingers are designed to facilitate movement of the spa/bath when subjected to large volumes hot water.

Flexible tube is suitable for solvent welding and is supplied as part of Flexidinger products at 300mm in length, which can be cut to a desired shorter length if required.

ID	FINISH	FINISH
POP-UP	Chrome	Chrome
14947	40x40 DWV	75

ID	FINISH	FINISH
CAP & LINING	NA	NA
11736	40x40 DWV	88

RELATED PRODUCTS:

Flexible tube can also be purchased separately in various lengths (see associated Fact Sheet)

PRODUCT SPECIFICATIONS

MEASUREMENTS (MM)

IMPORTANT NOTES:

- Do not overstretch or bend flexible tube at a right acute angle of less than 90 degrees.
- Pop-Up (14947) may not be suitable for installation on thin baths/spas.
